One Belt One Road Fusion of Civilisations Education Curriculum- Implementation in Chinese Schools

Your Excellency,

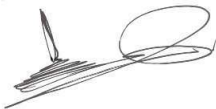

As the winner of “**2020 Chinese Government Friendship Award**”, it was an exclusive pleasure for me to meet up with you, have a group photograph along with other foreign experts and award winners, and listen to your visionary speech at the Great Hall of the Peoples in Beijing on 28 September 2023. We were also honoured by being invited to join the banquet dinner hosted H.E. XI Jinping, the President of P.R. of China the same evening to celebrate the 74th National Day. It was indeed a lifetime experience for my wife and me. I take this opportunity to congratulate the people of China and Your Excellency on the important occasion.

Excellency, as a Founding Fellow of the Academy of Engineering and Technology for the Developing World (AETDEW) and Vice President of the Belt and Road International Science Education Consortium (BRISEC) being nurtured by the CAST (China Association for Science and Technology), it was my great pleasure to present to you through the State Administration for the Affairs of Foreign Experts, the English version of the book; “**One Belt One Road Fusion of Civilisations Education Curriculum**”. The curriculum is absolutely in line with the vision and latest initiative of President XI Jinping’s “**Global Civilizations Initiative**”. It is formulated based on discoveries in the Belt and Road Civilizations, especially in the field of science and technology and includes the role of great travellers of the antient silk road times, and focusses on Water and Astronomy.

The curriculum is meant for implantation in schools in the Belt and Road countries including China, and has since been translated into Chinese language with the cooperation of Chinese Fellows of AETDEW. It is thus my honour and pleasure that on behalf of the President of AETDEW Academician Dato Dr. Engr. LEE Yee Cheong and all the Fellows, I present to you the Chinese version of the curriculum as well. As a sincere friend of China and on behalf of AETDEW colleagues, I request you to consider implementation of the “**One Belt One Road Fusion of Civilisations Education Curriculum**” in schools across China. We are confident that it will be very helpful in furthering the cause of your Global Civilizations Initiative across the Belt and Road countries.

We sincerely thank you very much and look forward to working together for the global peace and harmony.

With profound regards

SOOMRO, Manzoor Hussain, PhD, Professor

Winner of the 2020 Chinese Government Friendship Award, Order of Academic Palms (France), FAAET(F)
